**DETAILED ACTION*****Double Patenting***

1  
2  
3 1. The nonstatutory double patenting rejection is based on a judicially created doctrine  
4 grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or  
5 improper timewise extension of the "right to exclude" granted by a patent and to prevent possible  
6 harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.  
7 Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686  
8 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA  
9 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

10 A timely filed terminal disclaimer in compliance with 37 CFR 1.321 may be used to  
11 overcome an actual or provisional rejection based on a nonstatutory double patenting ground  
12 provided the conflicting application or patent is shown to be commonly owned with this  
13 application. See 37 CFR 1.130(b).

14 Effective January 1, 1994, a registered attorney or agent of record may sign a terminal  
15 disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37  
16 CFR 3.73(b).

17  
18 2. Claims 1-5, 7-14, 16-23 and 25-37 are rejected under the judicially created doctrine of  
19 obviousness-type double patenting as being unpatentable over claims 1-49 of U.S. Patent No.  
20 6,199,050 B1. Although the conflicting claims are not identical, they are not patentably  
21 distinct from each other because Alaia et al discloses a method/system, computer program of  
22 conducting an online auction between a plurality of potential bidders (potential sellers and a  
23 buyer; (see fig. 3), comprising the steps of: (a ) receiving a plurality of bids from  
24 bidders/sellers (see claim 1, col. 27, lines 37+; and figs. 3, col. 3, lines 29-32 and lines 46-

1        53); (b) ranking/comparing the bids in order of attractiveness (see current best bid, fig. 8,  
2        col. 4, lines 52-60); and (c ) for each bid, displaying the rank determined in step (b) to the  
3        bidder who made the bid (see col. 3, line 64 to col. 4, line 11); (d) transforming the bid into a  
4        buyer comparative bid parameter (see Event code, col. 4, lines 52-60);  
5                as in claims 2, 11, 20, 29, and 34, a method, system, and computer system which  
6        determines an ordinal rank for each bid that is displayed to the bidder (see fig. 8, col. 4, lines  
7        52-60; col. 9, lines 3-11; col. 13, lines 53-67; and col. 14; lines 41-49);  
8                as in claims 3, 12 and 21, comprises the step of ranking the bids in accordance with  
9        the price of the bids (see fig. 8, col. 4, lines 52-60);  
10               as in claims 4, 13 and 22, comprising the step of transforming a bidder comparative  
11        bid parameter into a comparative bid parameter for the originator of the auction (see col. 3,  
12        lines 24-32);  
13               as in claims 5, 14, 23 and 35, comprises a step of receiving transformed bid  
14        information (see figs. , col. 8, lines 41-65);  
15               as in claim 7, 16 and 25, comprising the additional step of transmitting the rank to the  
16        bidder (see figs. , col. 3, lines 64 to col. 4, line 11);  
17               as in claim 8, 17, 26 and 30 comprising the additional steps of repeating steps (b) and (c )  
18        as new bids are received (see col. 4, lines 61-65);

1           as in claim 9, 18, 27, 32 and 37 comprises the step of displaying a tie rank to the  
2 bidder if the ranking in step (b) results in a tie (see fig. 8); and  
3           as in claims 31 and 36, further comprising means for displaying a tie rank to the seller  
4 if a new bid results in a tie rank (see fig. 8).

5

6 3.       Claims 6, 15 and 24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-49 of U.S. Patent No. 6,199,050 B1  
7 in view of Togher et al (US 6, 014,627).

9           Alaia et al discloses all the limitation of the claims but fails to explicitly discloses, as in  
10 claims 6, 15 and 24, the step of receiving a bid price in a base currency, wherein the bid price  
11 is originally defined in a local currency of the first bidder. Togher et al teaches a  
12 receiving/bidding at a base price in a base currency, wherein the bid price is originally defined  
13 in a local currency of the first bidder (col. 6, line 41 to col. 7, line 65). To integrate the  
14 feature of foreign currency conversion found in Togher et al into the invention of Alaia et al  
15 would have been obvious because an artisan at the time of the invention of Alaia et al would  
16 recognize that vendors/sellers/bidders connected over the Internet to the system could be from  
17 different countries. Thus such countries would have different currencies, and have sought to  
18 use Togher et al's system to convert one currency into another over the Internet.
